HIA WA Executive Director appointed chair of Housing Industry Forecasting Group

HIA is pleased to announce WA Executive Director Cath Hart has been appointed as the new chair of the Housing Industry Forecasting Group (HIFG).

“I am looking forward to continuing to work with the stakeholders who contribute to HIFG,” Ms Hart said.

“Our residential building sector will play a vital role in the state’s post-COVID economic recovery, generating jobs, training and dwellings for West Australians.

“HIFG play an important role in assisting government and industry to understand housing market conditions.”

Ms Hart takes over from Steven Rowley, and acknowledged her predecessor’s contribution during his time in the role.

HIFG consists of 15 industry organisations helping forecast WA housing market activity, with the group’s most recent update confirming the number of dwelling commencements has been boosted by the state’s building grants.
